Vaccine Preventable:

Lead Terry Rundell

TB:

Goldendale: Lead Terry Rundell

White Salmon:

HIV:

Lead Stacy Doss second Terry Rundell

EH/RN

1. Check disease on communicable disease notifiable conditions chart for reporting time line. Using knowledge of communicable disease and resources such as Washington State Communicable Disease manual, the 16th edition of Control of communicable disease in Man, www.cdc.gov, case definitions, Red Book, and ACIP recommendations, determine needed information to obtain from lab, provider and reported person, generally beginning with the lab and provider. Some lab reports come from laboratories in Oregon. If there are culture isolates, check with Washington State 206-361-2800 to see if they would like any cultures sent to Washington State lab. If they want cultures, request Oregon lab send specimens to 1610 NE 150th Street, Shoreline, WA 98155.
2. As necessary carry out control measures beginning with the most urgent actions and notify the department of Health (206-361-2914) and Health Officer (Dr. Chris Spitters 206-675-0282) immediately of any communicable diseases reportable or within one day.
3. Complete appropriate forms and mail to:
